

EX NO:8

WRITE A SHELL SCRIPT USING COMMAND LINE
ARGUMENTS AND REPORTS ON WHETHER IT IS A
DIRECTORY, FILE OR SOMETHING ELSE

AIM:

To write a shell script using command line arguments and reports on whether it is a directory, file or something else

PROGRAM:

```
#!/bin/bash
echo "Enter the filename"
read file
if [-f $file]
then
echo "File"
elif [-d $file]
then
echo "Directory"
else
echo "something else"
fi
```

RESULT:

Thus the shell script using command line arguments and reports on whether it is a directory, file or something else has been developed and executed successfully.
